Pam Building is the **market-leading** manufacturer of cast iron above and below-ground drainage solutions. We are extending our range of VortX outlets to include a **line of high-quality** and competitive **aluminium roof outlets**.

They are manufactured here in the UK enabling us to **minimise transport-related carbon emissions**, provide a consistently excellent service and retain total control over quality.

Our **easy-to-install** products offer a reliable solution for rainwater management, helping you to meet the requirements of local building regulations. The range has been designed to be **compatible** with most waterproofing membranes and roof compositions.

We have designed the range with circularity in mind and as such our aluminium roof outlets are made from **80% recycled material** and are **100% recyclable at end of life**.

Thanks to the **corrosion resistant** properties of aluminium, all products in this range have a **life expectancy of over 40 years**. This new range embodies our motto – **safe & forever circular**.
